Innovate with confidence

We are your ideal partner for tailored, end-to-end sterile workflow solutions, thanks to a dynamic product range focused on reliability and efficiency. We are setting new benchmarks, ensuring our solutions meet and exceed our customers' ever-changing requirements driven by our motto "innovate with confidence".

Confidence is earned
from the start
of every project.

We understand that each facility is unique and has its own set of requirements and limitations. As innovators, we first seek to understand the precise needs of our customers. Then we utilize the full range of our portfolio to deliver reliable solutions to solve their toughest challenges.

Planning & Design

Planning and Design leads the way of our products and services portfolio. Whether our customer is planning a full-scale construction project or renovating their current Sterile Processing Department (SPD), our planning and design engineers bring their collective vision, wealth of expertise and tools, and rigorous management skills to every project—large or small.

Equipment

Our disinfection and sterilization solutions are created to deliver beyond the needs of today. With our space-saving designs, focus on sustainability, and long-term total cost of ownership, we strive to reduce cycle times, water usage, and utility costs, while increasing equipment load capacities.

Consumables

Our complete line of proprietary cleaning solutions and accessories reinforces our commitment to safe, high-performing sterile processing. That is why our consumable engineers focus on what is most important – protecting your patients, your staff, the environment, and your department's bottom line.

Service & Support

We provide total support and multiple options to help ensure equipment is properly and regularly maintained and serviced, maximizing uptime and productivity. Whether a new install, preventative maintenance, or repair, our highly skilled, experienced technicians will help maintain optimal performance over the entire lifetime of our customers' equipment.

Data & Connectivity

Our SmartHub Software Suite captures and connects information, equipment, instruments, and people with actionable digital intelligence. Traditional requirements of the sterile workflow are met on-site while maximizing your equipment investment and instrument availability with valuable data both locally and remotely.

Education & Training

Quality education and training is fundamental to make the most of your equipment. Our team of dedicated experts can support healthcare professionals both clinically and technically. From equipment-based training to clinical industry-related knowledge, our offerings can be customized to fit the needs of your department and provided in a variety of ways.
